

Proposed Claim Amendments Following Remand

1. (Proposed Amendment) A ~~development environment system~~ for producing a PostScript® printer description (PPD) text file associated with a printer, the ~~development environment system~~ comprising:

a base PPD text file that comprises information regarding the printer, the information including text in a first language, the base PPD text file adapted for a first software platform; and

a PPD generator adapted to import the base PPD text file and to generate therefrom a second PPD text file that includes text translated from the first language to a second language.

2. (Proposed Amendment) The ~~development environment system~~ of Claim 1, further comprising a build file that describes a product or platform specific set of features of the base PPD text file.

3. (Proposed Amendment) A method for generating a PostScript® printer description (PPD) text file associated with a printer, the method comprising:

providing a base PPD text file that comprises information regarding the printer, the information including text in a first language, the base PPD text file adapted for a first software platform;

providing a build file that comprises information as to how the base PPD text file should be edited to provide a second PPD text file that includes text translated from the first language to a second language; and

implementing the build file to automatically generate the second PPD text file.

4. (Proposed Amendment) A method for revising a PostScript® printer description (PPD) text file associated with a printer, the method comprising:

providing a base PPD text file that comprises information regarding the printer, the information including text in a first language, the base PPD text file adapted for a first software platform, and a build file that comprises information as to how the base PPD text file should be edited to provide a second PPD text file that includes text translated from the first language to a second language;

modifying the base PPD text file to provide a revised PPD text file; and

implementing the build file to automatically generate a second PPD text file from the revised PPD text file.

9. (Proposed Amendment) The ~~development environment~~ system of Claim 1, wherein the PPD generator parses the base PPD text file and the build file into text based instructions that may be parsed and assembled by PostScript® printer drivers.

11. (Proposed Amendment) The ~~development environment~~ system of Claim 1, wherein the PPD generator generates the second PPD file that is adapted for a second software platform.
